DETAILED ACTION***Allowable Subject Matter***

The following is a statement of reasons for the indication of allowable subject matter: Claims 58 and 63 are allowable over the art of record because the prior art does not teach a solid state optically addressable image generating and rendering device which constitutes a monolithic fabrication comprising of a photo-sensitive region and a photo-emissive region and which is configured to have the projected light cause a flow of charge carriers from the light affected photo-sensitive region to the photo-emissive region to cause a light emission, in combination with the remaining claimed limitations. Claim 68 is allowable over the art of record because the prior art does not teach an optically addressable image generating and rendering device which constitutes a monolithic fabrication comprising of a photo-sensitive region and a photo-emissive region and which is configured to have the projected light cause an amplified amount of charge carriers to flow, compared with those generated by the projected light, from the light affected photo-sensitive region to the photo-emissive region to cause a light emission, in combination with the remaining claimed limitations. Claims 76 and 87 are allowable over the art of record because the prior art does not teach an optically addressable image generating and rendering device which constitutes a monolithic fabrication comprising of a photo-sensitive region and a photo-emissive region and which is configured to have the laser scan on an area effect a flow of charge carriers from the photo-sensitive to the photo-emissive region to cause a light emission that defines a pixel or a picture element, in combination with the remaining claimed limitations.
